ABOUT ME

I am a third-year student specializing in Information and Applied Mathematics. I am passionate about leveraging technology to solve real-world problems. I am eager to take my first steps in the field, with the goal of narrowing down my future specialization. At this point, I don't have any specific priorities but am open to exploring different aspects of the industry. I easily adapt to new environments and enjoy taking on new challenges, especially when it involves spending my time in a purposeful way.

EDUCATION

Yerevan State University
Faculty of Information and Applied Mathematics
2022 - PRESENT

Within the framework of my university's educational program, I have explored a range of fascinating subjects and theories, including analytic geometry, discrete mathematics, mathematical logic, combinatorial algorithms, graph theory, networking, mathematical analysis and other related topics.

Studying data structures, ML, Web development, assembly languages, and many other topics has significantly enhanced my ability to tackle problems, identify the most effective solutions, navigate through challenges with ease, and develop a wide range of valuable skills.

ACTIVITIES

In my spare time, I strive to balance personal growth, with professional development. I volunteer at the "Dark" company and take pride in my role as the Head of PR for the YSU Scientific Committee. Additionally, I'm actively involved in the Pan-American Games.

Tennis is one of my passions, and I am the proud leader of a team in "Mkrtch' Where? Where?"—a team that clinched the champion title last year and the vice-champion spot this year at YSU.

I dedicate much of my time to furthering my professional knowledge. Currently, I'm studying PhD as part of my continuous effort to stay updated with the latest technologies and enhance my skills.
